

FOBATE - XT

(FERROUS ASCORBATE + FOLIC ACID)

We take care
of your
MOTHER

WHAT MAKES FOBATE-XT SO SPECIAL?

- Ferrous ascorbate has an advantage of providing both ferrous ion and ascorbate in the same compound
- Ferrous Ascorbate is the world's most widely recognized reference iron
- Devoid of any gastro-intestinal side-effects
- Enhanced Iron Absorption
- Faster haemoglobin rise

How does FOBATE-XT work?

- FOBATE-XT contains Ferrous Ascorbate (elemental iron) and Folic Acid
- Elemental iron restores iron stores quickly restoring the tissue iron stores, as well and correcting the anaemia eventually
- Iron helps in Haemoglobin formation
- Folic acid helps in the production and maturation of red blood cells
- Folic acid deficiency leads to Megaloblastic Anaemia in people and birth defects in children born to folic acid deficient mothers

Indications of FOBATE-XT

ANAEMIA: Helps boost the production of red blood cells and brings it to a normal level

PREGNANCY: Helps pregnant individuals to produce more blood that can help the baby grow normally

IRON DEFICIENCY: Used to treat Iron deficiency anaemia caused due to excess blood loss or inadequate iron intake

MEGALOBLASTIC ANAEMIA: Helps increase sufficient amount of folic acid

LACK OF NUTRITION: Used in cases of inadequate dietary intake
