

THIO-C

TABLETS

BRIGHTER skin complexion

REDUCES Hyperpigmentation

DELAYS signs of ageing

EVENS skin tone

GLUTATHIONE

- Glutathione acts as a Tyrosinase Inhibitor. Tyrosinase is an enzyme that catalyzes the biosynthesis of melanin which is responsible for skin darkening.
- Glutathione is the body's most powerful antioxidant. It detoxifies our cells, removes heavy metals, toxins and free radicals.
- Age spots can be minimized and prevented by enhancing the glutathione levels in the body.

VITAMIN C

- Vitamin C protects our skin from free radicals that develop due to excess exposure to the sun and environmental pollution.
- Vitamin C reduces sunburns and prevents the consequences of long term sun exposure, which can lead to skin cancer.
- It helps to boost collagen production. Collagen helps to hold the skin together, making it tighter and brighter.
