

The World's Most Preferred Combination That Assures Safety Against Infections

SURGMOX CV 625

Amoxicillin 500 mg + Clavulanic Acid 125 mg Tablets

- Amoxicillin-clavulanate is one of the most frequently used antimicrobials in emergency departments and primary care offices WORLDWIDE.
- Amoxicillin is a penicillin derivative and has a similar activity against both gram-positive and gram-negative bacteria.
- Furthermore, with the addition of clavulanic acid, the spectrum is increased to include beta-lactamase-producing strains, as well as broadening the coverage to include other bacterial species.
- Well tolerated by patients with a high safety profile.

Indications:

- Aspiration pneumonia
- Community-acquired pneumonia
- Acute bacterial rhinosinusitis
- Urinary tract infections
- Acute otitis media
- Skin and soft tissue infections
- Intra abdominal Sepsis
- Gynaecological infections
