

# In people with High Cholesterol Level Diet and Exercise may not be enough

INTRODUCING

**A novel antihyperglycemic agent**

**SIMSURGE-EZ 10/20 and 10/40**

Ezetimibe 10 mg + Simvastatin 20 mg Tablets

Ezetimibe 10 mg + Simvastatin 40 mg Tablets

**Ezetimibe:**

**Simvastatin:**

Inhibits the absorption of cholesterol from the small intestine and decreases the amount of cholesterol normally available to liver cells

The lower levels of cholesterol in the liver cells lead them to absorb more cholesterol from circulation and thus lowering the levels of circulating cholesterol

Decreases serum oxidized cholesterol generated by non-enzymatic reactions without impairing bile acid synthesis

Belongs to the drug class known as HMG-CoA reductase inhibitors, also called statins

Used to lower blood levels of "bad" cholesterol, to increase levels of "good" cholesterol, and lower triglycerides

## Uses:

- It is used for patients who cannot control their cholesterol levels by diet and exercise alone
- Lowers the level of "bad" cholesterol (LDL)
- Lowers the level of fat in your blood (triglycerides)
- Increases the level of your "good" cholesterol (HDL)

## Recommended Dosing:

- The usual dosage range is 10/10 mg/day to 10/40 mg/day. The recommended usual starting dose is 10/10 mg/day or 10/20 mg/day. SIMSURGE-EZ should be taken as a single daily dose in the evening, with or without food
- Patients who require a larger reduction in LDL-C (greater than 55%) may be started at 10/40 mg/day in the absence of moderate to severe renal impairment (estimated glomerular filtration rate less than 60 mL/min/1.73 m<sup>2</sup>)

## Also Available:

VILDASURGE-M 50/500, 50/850 and 50/1000  
Vildagliptin 50 mg + Metformin 500 mg Tablets

Vildagliptin 50 mg + Metformin 850 mg Tablets  
Vildagliptin 50 mg + Metformin 1000 mg Tablets
